

## Sustainability Policy

The Cranbury Public Library recognizes the important role libraries play in their communities and that a public library is essential to the public good of Cranbury.

In the interest of the public good, the Cranbury Public Library aims to minimize our organization's impact and maximize future generations' ability to live, work, and play in our shared community, with equal access to clean air, clean water, and natural resources.

The Cranbury Public Library's Board of Trustees and Library staff are committed to the "triple bottom line" definition of sustainability: *to be truly sustainable, an organization must embody practices that are environmentally sound, and economically feasible, and socially equitable.*

The Library Director and the Library Board of Trustees encourage Library staff to apply sustainable decision making throughout the Library's policies, procedures, and practices, including, but not limited to, the areas of facilities, operations, technology, programming, purchasing, and partnerships.

In its commitment to sustainable principles, the Cranbury Public Library aims to ensure a resilient, sustainable community and Library for all our residents.
